Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3781

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants are advised that there doesn't appear to be sufficient structure set forth in claim 14 for simple inner and outer containers to effect the function "so that every mouthful of beverage...liquids" claimed at the end of the claim, thereby rendering the claims functional and incomplete.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 14-16, insofar as they are definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over Cameron-Price WO '434 in view of Dirksing '103.

Cameron-Price teaches a beverage bottle with an inner container having one beverage component and another container comprising a second beverage component for simultaneous dispensing. To have sized and configured the inner and outer containers so that the components are dispensed at a constant ration would have been obvious in view of such teaching by Dirksing.

A helical surface on the inner container amounts to no more than threads for connection of the inner container.

Art Unit: 3781

4. Claims 14, 16 and 17 insofar as they are definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over Vyborny GB '226, cited by applicants, in view of Dirksing '103.

To have configured the inner and outer container for simultaneous dispensing at a constant ratio would have been obvious in view of such teaching by Dirksing.

5. Applicant's arguments, see pages 6 and 7 of the amendment, filed 1/30/07, with respect to the rejection of claim 1 have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn.

6. Claims 1-13 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents show other compartmented containers.

The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
